### DETAILED ACTION

Applicant's election of Group V, Claims 41-42 in Paper No. 15 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-18, 20-40, 45, 46 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 15.

An action on the merits of Claims 41 and 42 elected without traverse in Paper No. 15 is contained herein below.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 41 is rejected under 35 U.S.C. 102(e) as being anticipated by von Borstel et al (US 5736531)

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37

Art Unit: 1623

CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Von Borstel et al drawn to compounds, compositions and methods of treatment and prevention of toxicity due to chemotherapeutic agents teach the use of acyl derivatives of uridine and cytidine (pyrimidine nucleotide precursor) for preventing or ameliorating the toxic effects of cancer chemotherapy agents. They teach the oral administration of triacetyl uridine for the amelioration of the toxicity of 5-fluorouracil (not a pyrimidine nucleoside analog, since it does not have a ribose unit) (see abstract, col. 5, lines 1-66). The dosage typically ranges from 0.5 to 20 grams per day and most commonly 2 to 10 grams per day (see col. 23, lines 55-59).

### ***Conclusion***

1. Claim 41 is rejected.
2. Claim 42, drawn to specific side effects is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
